OVERVIEW

For more than 50 years, since the original debuted in 1973, the Volkswagen Passat has been a cornerstone of the brand's appeal – both here in the UK and around the world. Generations of families, alongside innumerable business drivers, have turned to the Passat over and over again for their daily transport needs and now, in ninth-generation form, the latest iteration of this everyday icon is once again set to keep that proud record of practicality, comfort and convenience alive.

Offered in the UK once again exclusively in estate body style, today's Passat is manufactured on the latest version of Volkswagen Group's hugely successful modular transverse matrix platform, MQB evo, and builds on the familiar virtues of its forebears that have charmed buyers for generations. Showcasing new

levels of technology, quality and style, the new Passat promises to once again deliver the quality, practicality and style that helped its forebears to a sales total of more than 34 million examples sold worldwide to date (March 2024).

Matching business class travel with family car practicality, the new Passat is breaking conventional car class boundaries with luxury features in a family-friendly package. Maximising available cabin space is a Passat trademark, and the new model enhances that feature further by offering even more interior room in what is one of the most aerodynamic estates the company has yet created. A coefficient of drag (Cd) measurement of just 0.25 makes the car more slippery through the air than even some sports models. All this while adding

Efficient, practical, safe and stylish: Passat has been a byword for these vital family car characteristics for more than half a century, and today's ninth-generation version is once again imbued with all of these virtues, alongside many more. Exceptional design accompanies excellence in manufacturing to make today's Passat a match not only for the rivals in its class, but for those from sectors with a luxury price tag.

Rod McLeod, Director, Volkswagen UK

valuable space inside: 50 mm more rear legroom versus the outgoing model and between 690 litres (+40 litres) and 1,920 litres (+140 litres) of load capacity in the boot. This is achieved via a larger wheelbase which is 50 mm longer than the previous Passat Estate (2,841 mm), while the new car is 144 mm longer than before (4,917 mm). The width has increased by 20 mm to 1,849 mm. Meanwhile, the height (with aerial) is almost unchanged at 1,497 mm.

As ever, today's Passat features cutting-edge engineering that, in this case, includes the arrival of new plug-in eHybrid engine options with outputs of 204 PS or 272 PS. Joining the line-up later in 2024, these plug-in eHybrid units combine a high-tech turbocharged petrol engine (1.5 TSI evo2) with a new 19.7 kWh battery (net energy content), which

Volkswagen forecasts will offer a range of more than 60 miles (depending on equipment). The battery can be charged at AC points with 11 kW instead of the previous 3.6 kW, and both Passat Estate eHybrid models can be plugged in at rapid public DC points, with up to 50 kW charging capacity.

The new Passat is available here in three trims at launch: Life, Elegance and R-Line, and these all come with a six- or seven-speed automatic direct-shift gearbox (DSG) as standard. Prices begin at £38,490 (RRP OTR).

Five eHybrid versions will be added to the line-up in the future; these will have a six-speed DSG as standard and are expected to have huge appeal in particular for fleets and business drivers.

Fast facts

New Passat

- » The Passat has been a mainstay of the Volkswagen range for more than 50 years, originally launching internationally in 1973
- » The ninth-generation model comes to the UK with a new, even more aerodynamic shape – its coefficient of drag (Cd) is just 0.25
- » The Passat, as with the new Tiguan, is built on Volkswagen's latest MQB evo platform. These are the first two Volkswagens to be built on this platform, which allows access to a new digital cockpit based on the fourth-generation (MIB4) modular infotainment matrix
- » Launching with the frugal 1.5 TSI 150 PS mild hybrid petrol engine, the Passat range will expand to include new plug-in eHybrid engines with outputs of 204 PS and 272 PS later in 2024
- » The new Passat is available in three trims: Life, Elegance and R-Line (April 2024) and all derivatives come with a six- or seven-speed automatic direct-shift gearbox (DSG)

Leader in technology

- » The Passat's new plug-in eHybrid drives combine a high-tech turbocharged petrol engine (1.5 TSI evo2) with a new 19.7 kWh battery (net energy content), which Volkswagen forecasts will offer a range of more than 60 miles between charges (depending on equipment)
- » The new model arrives with an enhanced range of state-of-the-art assist systems. Depending on the trim level, these include optional or standard Park Assist Plus, a new memory function for Park Assist and Park Assist Pro
- » Via MQB evo, the Passat's digital cockpit offers intuitive operation and a voice assistant that, in the near future, will have access to ChatGPT
- » Today's Passat features Digital Cockpit Pro (digital instruments) and the latest-generation infotainment system. The MIB4-based infotainment system's new graphics, structure and menu navigation have been designed to maximise simplicity and clarity, while remaining intuitive and customisable

Leader in agility

- » The Passat's enhanced running gear includes the option of the new adaptive DCC Pro system alongside a new Vehicle Dynamics Manager, which controls the functions of the electronic differential locks (XDS) and the lateral dynamics components of the adaptive shock absorbers in the DCC Pro system
- » The ninth-generation model's running gear comprises a MacPherson front axle and a four-link rear axle

Volkswagen in the UK

- » Total Volkswagen registrations in the UK in 2023, including passenger-carrying models from Volkswagen Commercial Vehicles, were 162,087. The Passat contributed 1,572 to that total in the same period (figures supplied by the Society of Motor Manufacturers and Traders)

PACKAGE AND DESIGN

- › The Passat's wheelbase is 50 mm longer than the previous version's (2,841 mm), while the new car is 144 mm longer (4,917 mm). Width is up 20 mm to 1,849 mm while the height (with aerial) is almost unchanged at 1,497 mm
- › Majoring on practicality, there's 50 mm more rear legroom versus the outgoing model and between 690 litres (+40 litres) and 1,920 litres (+140 litres) of load capacity in the boot
- › An exceptional drag coefficient of 0.25 Cd makes the new Passat quiet, frugal and the most aerodynamic Volkswagen estate to date

Exterior design: all new, yet reassuringly familiar

The front

The exceptionally aerodynamic (drag coefficient of 0.25) and powerful design of the new Passat’s nose immediately emphasises its road presence. While remaining instantly recognisable as a member of the Passat dynasty, every detail is new. Take the bonnet, for example: while the predecessor’s bonnet was higher in the middle than at the sides, the new bonnet is now lower in the middle. It rises sculpturally outwards with sharp lines and forms powerful wings.

The new LED headlights, with their two modules, provide a characteristic look in combination with the narrow LED daytime running lights above them. These two daytime running light elements are linked to each other by means of a horizontal LED strip in the radiator grille. The visually continuous light strip gives this Volkswagen a wide, elegant look. Volkswagen offers the Passat with a new generation of the IQ.LIGHT LED matrix headlights (optional on Life trim, standard on Elegance and R-Line). These come with a new high-performance main beam that has a significantly increased range.

The silhouette

Side on, the Passat is distinguished by powerful surfaces and a sharp undercut as a character line, which appears at the height of the door handles. There’s a significantly larger wheelbase over the outgoing model, while the long side window areas support the new car’s elegant dynamism. At the front and back, the undercut and surface design over the wheel housings form powerful shoulder sections in

Today’s Passat, offered exclusively in estate body style, cuts a sleek, elegant figure on the road which aligns with its aerodynamic performance in the wind tunnel. With a Cd figure of just 0.25, this new Volkswagen is exceptionally efficient in terms of its wind resistance

a slim silhouette. The striking D-pillars match this sporty image with their more pronounced forward angle and more dynamic look, demonstrating that an enhanced design and an increase in luggage compartment capacity (up 40 litres) do not have to be mutually exclusive. Under the slightly flared wheel housings, the Passat sports up to 19-inch wheels.

The rear

As with the front and sides, the rear of this new Volkswagen has a clean, powerful design. The continuous LED tail light clusters, seen in Passat for the first time, emphasise the width of the body and have a transparent, hi-tech look derived principally from their new 3D light signature. In the upper part of the boot lid, the large roof spoiler and the side air guide elements on the D-pillars stand out. These aerodynamic features reduce turbulence at the rear and contribute to low fuel consumption and long range. A diffuser below the bumper completes the Passat's sporty look

Careful attention to design details, such as LED taillight clusters and large roof spoiler, combine to give the new Passat an air of luxury that elevates it above its traditional competition

Interior design: the debut of a bold new landscape

Next-generation interior

This ninth-generation Passat is equipped with a bold new cockpit architecture, built around the Digital Cockpit Pro (digital instruments) and the latest-generation infotainment system. The system’s visually freestanding display features a new graphic and menu structure that is intuitive and easy to operate. Many of the Passat’s settings can also be controlled using a new, natural IDA voice control function with ChatGPT integration.

Digital Cockpit Pro

The instruments are displayed on a 10.25-inch screen with 1,280 x 480 pixels. Thanks to a new surface coating to reduce reflections and glare, the cockpit has a flat design and is integrated into the dash panel like a large screen – there is no longer a need for an overhang at the top to provide shade. The graphic interface is also new, with new functions added. Using buttons on the multi-function steering wheel, the driver can select different basic graphic configurations (views) that can in turn be individually tailored. There is a choice of four views: Classic (round dials), Progressive (square fields), Navigation (displayed navigation map with route guidance) and, for the Passat R-Line, the eponymous R-Line view (with R logo, gear-change indicator and special rpm display).

Infotainment upgraded

The Passat’s central touch display acts as the digital headquarters for the new, fourth-generation, MIB4-based infotainment system. The new standard infotainment system display measures 12.9 inches diagonally with 1,920 x 1,080 pixels, while the Discover Pro Max offers a 15-inch screen with 2,240 x 1,260 pixels. The new graphics, structure and menu navigation

Inside, the latest generation Passat debuts a bold cockpit architecture that accentuates form while supporting function. Sumptuous materials and expressive design features complete the luxurious look and feel inside

in both versions are identical. Maximising simplicity, the display has been divided into two touch bars at the top and bottom of the screen, with the home screen in-between. The driver can assign favourite direct-access functions to large areas of the top bar and home screen and, to aid simpler use, the individually configured top bar and static bottom bar remain continuously displayed when the driver opens various functions in the form of apps on the home screen. Backlit touch sliders for temperature and volume settings are located under the infotainment display.

New steering column switches

The new Passat’s centre console offers plenty of storage space because, as with the latest ID. models, gear changes are now carried out by means of an intuitive steering column switch. The switch is turned forward towards ‘D’ to drive forwards and backwards toward ‘R’ to reverse, while the parking brake is activated by pressing the side of the switch. A new multi-function steering column switch is now used to control the Passat’s indicators and windscreen wiper functions.

More space

Thanks to the new car’s longer wheelbase, the maximum legroom increases by 50 mm to 947 mm. Boot capacity is up by 40 litres to 690 litres (when loaded up to the height of the rear seat backrests). Load space grows by 140 litres to 1,920 litres when the rear bench seat is folded down. Quality and comfort have both been further improved, too, thanks to the use of new, high-grade materials, newly developed seats and more effective noise insulation. In addition to the standard acoustic windscreen, double glazing with an acoustic film is now used for the front and rear side windows.

The new car’s steering column-mounted gear shift liberates valuable room in the centre console, while an infotainment screen measuring up to 15 inches across majors on simplicity and intuitive operation

» **Combining exceptional comfort, huge interior space and business-class quality in what is now an even more aerodynamic silhouette – and which is available as a highly efficient eHybrid car – is no mean feat. Today’s Passat once again represents many of the engineering and design innovations that have become a Volkswagen trademark over the years.**

Owen Shepherd, Head of Direct Sales, Volkswagen UK

Luxury class seats

Elegance and R-Line versions of the new Passat gain new ergoActive front seats (comfort seats) including lumbar support adjustment and pneumatic three-chamber massage in the seat backrests. Top-of-the-line seats, available as an option, are labelled ergoActive Plus and feature electric 14-way adjustment as well as a 10-chamber pressure point massage function in the backrest and an active air conditioning function (seat heating and ventilation). In addition to the individual settings, the driver and front passenger can activate an automatic mode in which temperature and moisture sensors detect the need for cooling and/or heating and control the seats' climate accordingly.

Estate buyers value space above much else and the new Passat delivers it like never before. Cabin and load bay alike have been carefully and intelligently expanded, without a huge increase in this Volkswagen's 'footprint' on the road

ENGINES AND RUNNING GEAR

- › Passat debuts new efficient eHybrid drivetrains with new DC fast-charging capabilities up to 50 kW
- › New eHybrid Passats will offer an all-electric range of 77 miles between charges
- › All new Passats feature either a six- or seven-speed automatic direct-shift gearbox (DSG) and front-wheel drive

Innovative and efficient

Drivetrain choices

At its launch in the spring of 2024, the Passat arrives with a turbocharged 1.5-litre petrol engine (TSI) that will be joined later in the year by two new plug-in hybrid drive (eHybrid) engine options. All are combined with a either a six- or seven-speed direct-shift gearbox (DSG) as standard.

The two new eHybrid units use the 1.5-litre TSI evo2 petrol engine alongside significant battery capacity to deliver exceptional economy and impressive performance. These eHybrid models offer system outputs of 204 PS (150 kW) and 272 PS (200 kW).

The eHybrids boast an efficient and large battery (19.7 kWh net) with a higher charging capacity (up to 50 kW) which, alongside the hi-tech turbocharged petrol engine (1.5 TSI evo2), constitute a new hybrid strategy. With this powertrain in place, the new Passat eHybrid promises an electric range of 77 miles (WLTP), thereby effectively becoming an all-electric car in the majority of everyday driving.

Moreover, today's Passat eHybrid is able to achieve a forecast combined range of almost 500 miles between fuel stops, making it ideally suited to long family trips or business journeys. The 204 PS version will offer system torque of 350 Nm, while the 272 PS version will provide up to 400 Nm – both are controlled electronically to maximise efficiency.

19.7 kWh high-voltage battery

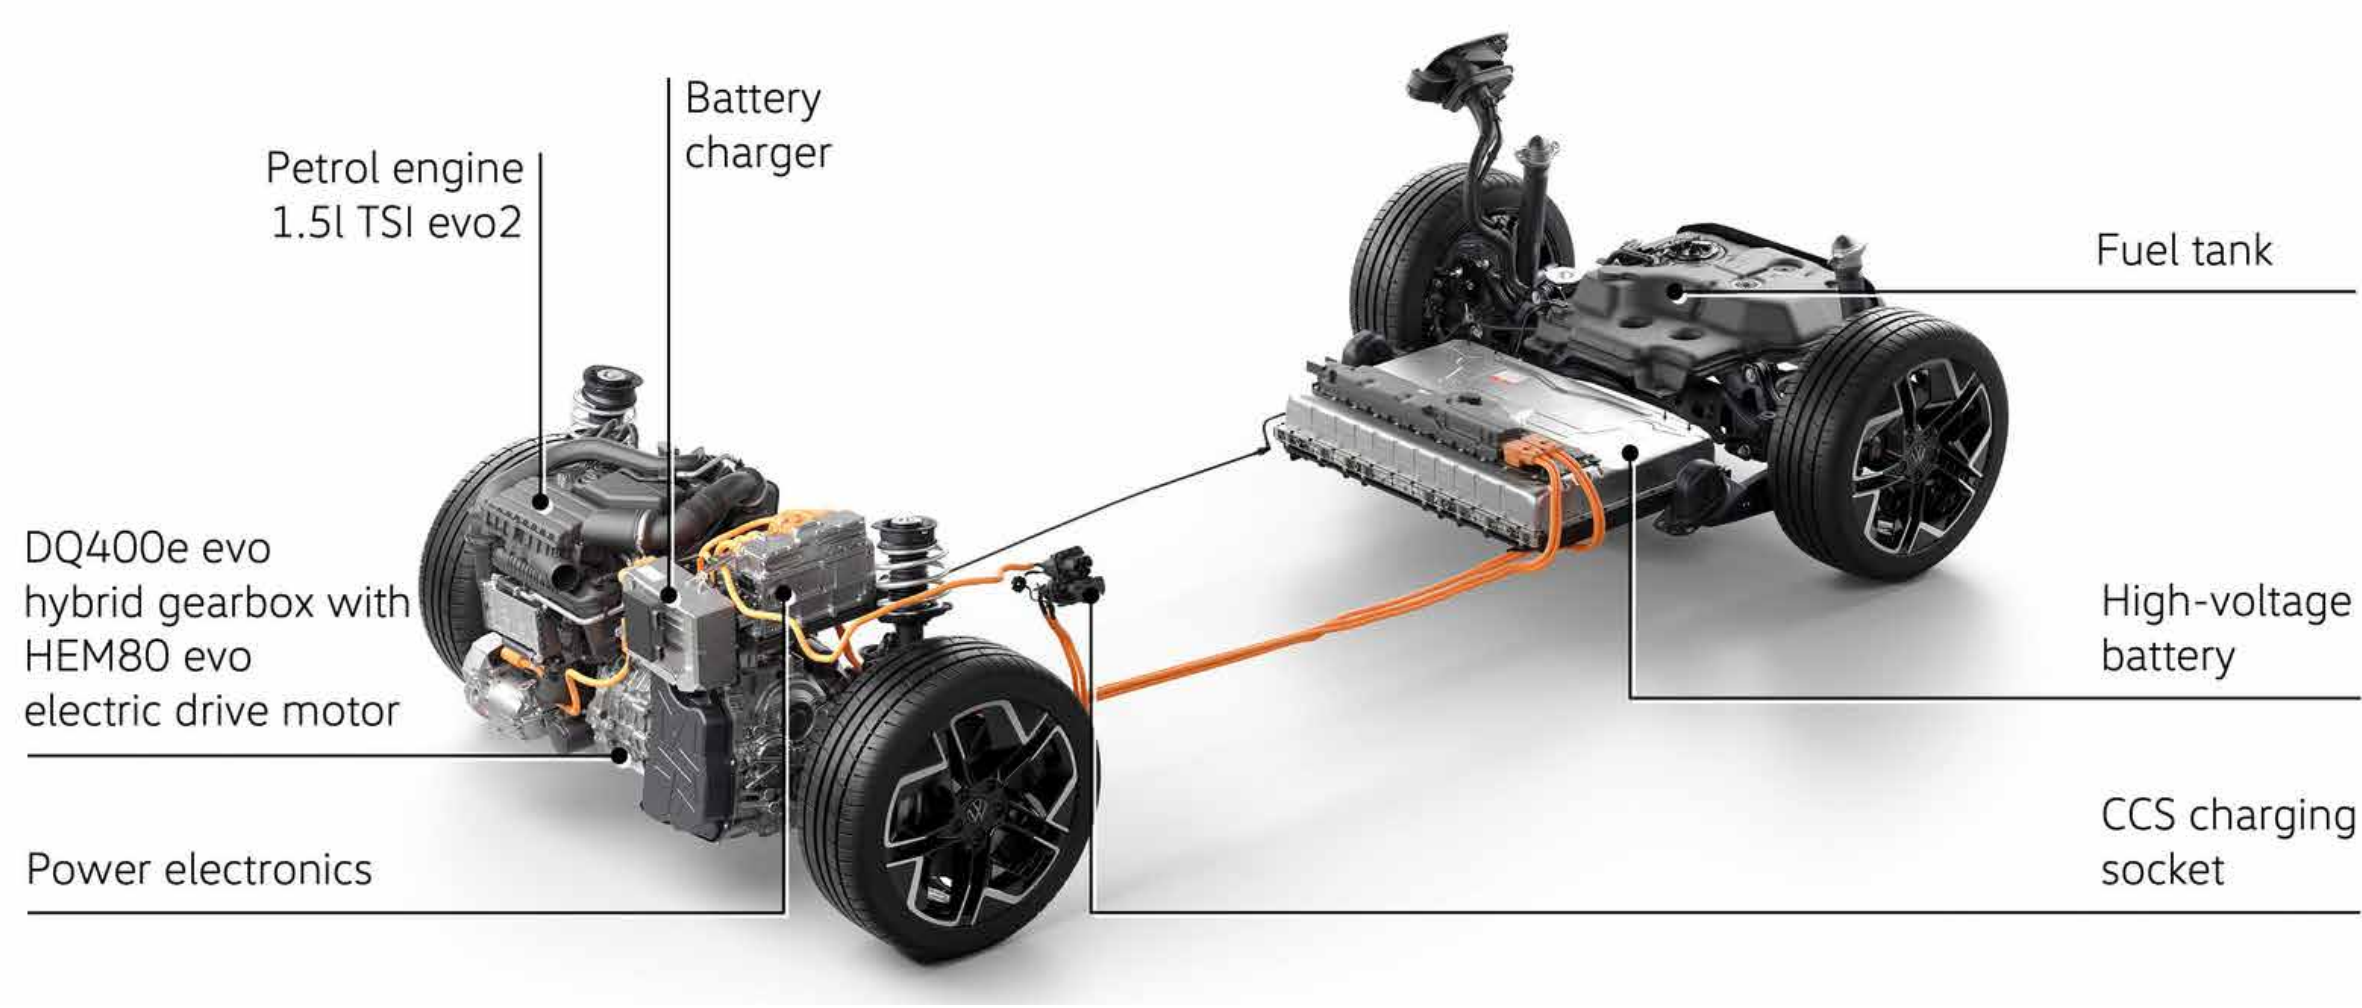

The secret to the Passat eHybrid's hugely increased electric range is its new high-voltage battery. The net energy content increases from 10.6 to 19.7 kWh and the battery has a new cell technology for its 96 modules alongside external liquid cooling. Since the lithium-ion battery is also positioned in front of the rear axle, the interaction with the front-mounted drive (electric motor, DSG, TSI) also results in balanced weight distribution.

Efficient charging

The power flow between the battery and the electric drive motor is managed by new power electronics. This converts the alternating current (AC) of the supply/ charge into direct current (DC) for the electric drive motor. In addition, a DC/DC converter supplies the 12-V electrical system. A new charger means it is now possible to charge with up to 11 kW instead of 3.6 kW at AC charging points such as a wall box.

The plug-in hybrid drives can be charged at DC rapid-charging stations up to 50 kW. Via this method, a battery with a charge level as low as 10 per cent is charged to 80 per cent again in about 23 minutes.

The charge level of the battery can now be maintained at five selectable levels while the vehicle is on the move, too, in order to drive electrically through a low-emission zone at the destination, for example.

New plug-in hybrid drive (eHybrid) engine options debut in Passat making this business-class offering as efficient as it is elegant, and providing the facility for the majority of day-to-day journeys to be completed entirely on electric power

Adaptive running gear for agility and comfort

DCC Pro

The use of MQB evo in the new Passat delivers a new generation of running gear for class-leading comfort and stability. Alongside numerous engineering changes, Volkswagen has developed an enhanced adaptive chassis control system in the shape of the DCC Pro (optional on Life and Elegance trims, standard on R-Line). Moreover, the Passat is equipped with a Vehicle Dynamics Manager for the first time. This controls the functions of the electronic differential locks (XDS) and the lateral dynamics components of the controlled shock absorbers in the optional DCC Pro system.

This combination of technologies delivers more neutral, stable, agile and precise handling characteristics by virtue of features such as wheel-specific braking interventions and wheel-selective adjustments of shock absorber stiffness. General performance improvements are also provided by increased camber stiffness and higher lateral force steering of the four-link rear axle (increased rear axle stability and, thus, greater driving safety).

The electronic active damping control reacts continuously to the road conditions and driving situation and takes into account parameters such as steering, braking and acceleration. The ideal damping is calculated for each wheel and is adjusted via the shock absorbers within fractions of a second. The driver has the option of individually adjusting the DCC system to settings ranging from very comfortable to very sporty.

For the first time in the Passat, the lateral dynamics components of the adaptive chassis control are also coordinated and optimised by means of the Vehicle Dynamics Manager, for optimum driving comfort and outstanding driving dynamics. Compared with the predecessor's DCC with single-valve dampers, the dampers in the new DCC Pro are equipped with two

As agile as it is efficient, the new Passat offers the option of an enhanced adaptive chassis control system (DCC Pro) alongside a Vehicle Dynamics Manager. The result is a ride and handling package with a huge breadth of ability

» The latest-generation Passat builds on a proud half-century of engineering excellence. It delivers class-leading technologies in the shape of eHybrid drivetrains and sophisticated assistance systems which, together, make for convenient, considerate and impressively comfortable travel. «

Ben Roche, Passat Product Manager, Volkswagen UK

valves. This change is accompanied by an adapted control algorithm for separate rebound and compression stage control. The faster two-valve shock absorbers facilitate a better and quieter connection between the body and running gear at the same time as optimised driving dynamics, thanks to the even more precise control of the rebound and compression stages.

Park Assist with memory and remote function

Among a range of upgraded and state-of-the-art assistance systems, the option of new Park Assist Plus on Passat stands out in particular. This new memory function for Park Assist and Park Assist Pro builds on the familiar features of Park Assist and Park Assist Pro, seen in other Volkswagen vehicles, which allow assisted driving into and out of parallel or bay parking spaces. The Passat takes over control of acceleration, braking and steering to achieve this. However, the new feature for the enhanced Park Assist Plus sees the addition of a useful memory function.

The system records the final 50 metres driven, and thus the parking situation, which can be stored when the car has come to a stop. When the Volkswagen reaches this position again it automatically offers to take over the parking manoeuvre, and up to five parking manoeuvres can be stored.

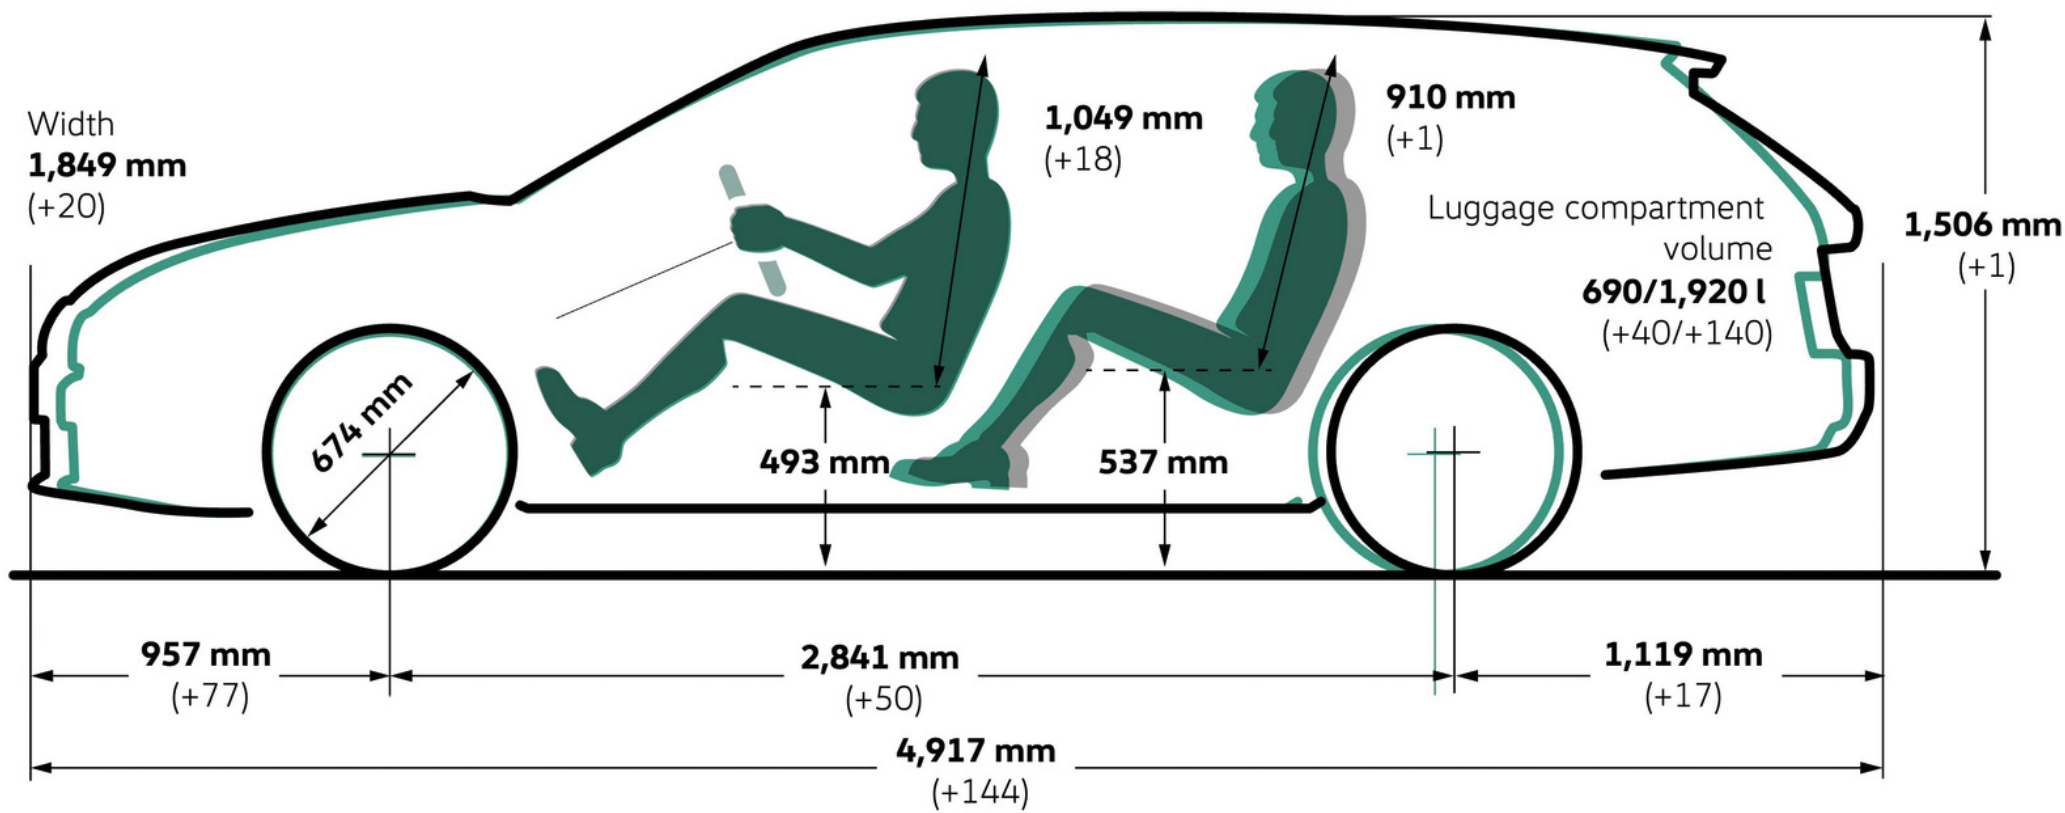

Remote parking is also new (available from late 2024/early 2025). Using Park Assist Pro and an app of the same name, it is possible to drive the Passat into and out of parking spaces remotely from outside the vehicle using a smartphone, subject to system limits.

Today's Passat represents the culmination of more than 50 years of painstaking engineering and design development by generations of Volkswagen engineers and designers intent on one goal: to create the ultimate business-class estate

Technical data

	Passat 1.5 TSI 150 PS 7-speed DSG	Passat 1.5 TSI eHybrid 204 PS 6-speed DSG	Passat 1.5 TSI eHybrid 272 PS 6-speed DSG

Servicing and warranty

Volkswagen offers customers a choice of servicing regimes for the Passat. They can choose fixed service or flexible service depending on how the car is likely to be driven and its general use.

The fixed service regime is recommended for vehicles that will cover less than 9,300 miles in 12 months and if the vehicle is likely to be used in the following way:

- Predominantly urban driving, short journeys with frequent cold starts
- Activities regularly producing high engine loading, for example frequent hill climbs, driving with vehicle fully loaded and towing
- Driving with high rpm, hard acceleration and heavy braking. In this case, the vehicle will be serviced at regular intervals, at every 9,300 miles or every 12 months

Flexible service is recommended for vehicles with a daily mileage of more than 25 miles, where the vehicle is driven regularly and on mainly long-distance journeys. The vehicle should be mainly driven at a constant speed with minimum vehicle and engine loading, minimal towing and driven in an economical manner.

In this case, the on-board computer tells the driver, via a dashboard display, when the vehicle needs a service. A range of engine sensors electronically monitors the vehicle's oil temperature, oil pressure, oil level and brake pad wear to establish when a service is needed. With the flexible regime, the vehicle can typically cover up to about 18,600 miles or 24 months (whichever is sooner) between oil changes. An inspection service is typically due in the third year of ownership or at 40,000 miles, and thereafter every second year for vehicles with an annual mileage of about 10,000 miles.

Customers can choose between fixed and flexible servicing at pre-delivery inspection (PDI). It is possible to change from one to another during the vehicle's lifetime, but this can only be done when a full inspection service is due.

Warranty

The Passat has a three-year (first- and second-year manufacturer operated, third-year Retailer-operated)/60,000-mile mechanical warranty. In addition, it comes with a 12-year body protection guarantee, three-year paint warranty and a year's membership of Volkswagen Assistance, which includes European breakdown cover. The latter can be extended at minimal cost to the customer.

Passat range summary

Passat Life

- Petrol
- Plug-in Hybrid

Key features

- Alloy wheels 7.5 x 17-inch Bologna Dark Graphite diamond-turned
- Rear-view camera
- Navigation system
- Digital Cockpit Pro 10.25-inch high resolution
- High Beam Assist, automatic sensing for switching between dipped and main beam
- LED headlamps
- Massage seats in front (three-point massage)
- Leather-wrapped multi-function steering wheel with shift paddles
- Air Care Climatronic (three-zone) with rear air conditioning control panel
- Adaptive cruise control (ACC)
- Electrically heated, adjustable and folding door mirrors
- Keyless locking and starting system with SAFELOCK
- Car2X - intelligent vehicle networking
- Full electric tailgate operation

Passat Elegance

- Petrol
- Plug-in Hybrid

Key features (over Life)

- Alloy wheels 7.5 x 17-inch Napoli metallic
- Sports comfort seats in front
- Inserts of front seats and outer rear seats in ArtVelours Eco microfleece
- Massage seats in front (13-point massage)
- Aluminium decorative inserts
- LED rear combination lamp, variable lighting functions
- Tilting and sliding panoramic sunroof with rear panoramic sunroof
- Accoustics Pack

Passat R-Line

- Petrol
- Plug-in Hybrid

Key features (over Life)

- Alloy wheels 8J x 18-inch Coventry black diamond turned
- Black Styling pack
- Sports seats in front
- Inserts on front and outer rear seats in Karoso R-Line fabric
- Dynamic Chassis Control (DCC), variable suspension settings, sport, comfort and normal
- Interior ambient lighting with 30 colour options
- IQ.LIGHT - LED Matrix headlamps with LED sep. daytime running light, dynamic cornering light and dynamic turn signal
- Brushed stainless steel pedals
- Massage seats in front (13-point masssge)
- LED rear combination lamp, variable lighting functions

Standard equipment

Passat Life

From: £38,490 RRP OTR (April 2024)

Alloy wheels and suspension

- 17-inch Bologna Dark Graphite diamond-turned alloy wheels
- Anti-theft wheel bolts
- AirStop® tyres 215/55 R17
- Tool kit and tyre mobility set: 12-V compressor and tyre sealant

Exterior

- Headlight range control
- Heat-insulating tinted glass in side and rear windows
- High Beam Assist, automatic sensing for switching between dipped and main beam
- LED headlamps
- LED rear combination lamps
- Rear fog light on one side, reversing light on both sides
- Illuminated door handle recesses

Interior

- Aluminium decorative inserts
- Carpet mats, front and rear
- Comfort seats in front
- Inserts of front seats and outer rear seats in ArtVelours ECO microfleece
- Leather-wrapped multi-function steering wheel with shift paddles
- Luggage compartment cover, power operated
- Manual height adjustment for front seats with seat cushion tilt and depth adjustment and electronic backrest adjustment on both sides
- Sun visors with illuminated vanity mirrors for driver and front seat passenger
- Three rear head restraints
- Unsplit rear seat bench, split folding backrest with centre armrest
- Heated front seats
- Massage seats in front (three points)
- Welcome light with surround lighting

In-car entertainment and communications

- Discover Media navigation system including streaming and internet
- Two USB-C ports in the front, two USB-C charging sockets on the centre console in rear, charging capacity up to 45 W

- Eight speakers
- Car2X – intelligent vehicle networking
- Digital Cockpit Pro 10.25-inch high resolution
- Digital radio reception (DAB)
- Inductive smartphone charging without external antenna connection (fast charge)
- Infotainment system with 12.9-inch display
- Preparation for We Connect and We Connect Plus
- Voice control and enhancer
- Wireless App-Connect
- E-sim card for online connectivity

Safety and security

- Alarm with interior protection
- E-call emergency call service
- Curtain and side airbags in front with centre airbag
- Disc brakes in front
- Driver and front passenger airbag with front passenger airbag deactivation, including knee airbag on driver side
- Front Assist – autonomous emergency braking with pedestrian and cyclist monitoring
- Isofix child seat preparation, easy-fit (for two outer rear seats, and front passenger seat), compatible with I-size
- Warning triangle with first-aid kit
- Extended safety system (proactive passenger protection system)

Driver assistance

- Advanced driver attention and drowsiness monitor
- Dynamic road sign display
- Driver Assistance Pack including pedestrian monitoring, lane assist, adaptive cruise control (ACC) and autonomous emergency braking
- XDS electronic differential lock
- Vehicle dynamics manager
- Oncoming vehicle braking when turning, including swerve support
- Power-assisted steering, speed sensitive
- Predictive speed limiter
- Rear-view camera
- Standard electronic engine sound (exterior sound actuator)
- Travel Assist with Lane Assist

Comfort and convenience

- Air Care Climatronic (three-zone) with rear air conditioning control panel
- Ambient lighting, with backdrop light
- Auto-dimming rear-view mirror
- Electrically heated, adjustable and folding door mirrors
- Heated front seats
- Full electric tailgate operation
- Keyless locking and starting system with SAFELOCK
- Laminated safety glass windscreen with heat and sound insulating
- Massage seats in front (three points)
- Memory feature for Park Assist
- Park Assist with park distance control
- Park and comfort pack
- Rain sensor
- Sunblinds for rear side windows, manual

All prices listed are manufacturer’s on-the-road recommended retail price (includes VAT, VED, delivery to Retailer, number plates and first registration fee). Volkswagen may change RRP’s at any time (this includes where there are Government changes in regulation and/or legislation). Vehicle specification may vary as Volkswagen UK reviews the model range line-up throughout the year. Buyers are advised to clarify exact vehicle specification and price with a Volkswagen Retailer at the point of order.

All equipment details, prices (including 20 per cent VAT) and power specifications apply to the model range offered in the UK. Figures in this media pack are correct at the time of publication (April 2024).

Options

VOLKSWAGEN STRATEGY

ACCELERATE

Introduced in 2021, the ambitious ACCELERATE brand strategy describes Volkswagen’s transformation into a tech company via the development of key activities such as e-mobility and digitalisation, alongside the use of new business models and autonomous driving. The Volkswagen brand is investing around 18 billion euros in e-mobility, hybridisation and digitalisation by 2026. Volkswagen is changing, from the ground up, and via ACCELERATE it is giving the digitalisation of the brand a further major boost.

Way to Zero

The Volkswagen Group intends to be net carbon neutral by 2050 at the latest. An interim milestone is the targeted 40 per cent reduction in CO₂ emissions per vehicle in Europe by 2030. As well as accelerating the transition to e-mobility, the production (including supply chain) and operation of electric cars is being made net carbon neutral. Added to this is the systematic recycling of the high-voltage batteries from old electric vehicles. Volkswagen is taking a holistic approach to decarbonisation: from production through service life to recycling. It is also the first car maker to support the expansion of renewable energies on an industrial scale.
